Executive Summary

MOSES proposes a set of innovations to significantly improve the modal split of containerised cargo transport across Europe by enhancing the Short Sea Shipping component of the European container supply chain.

This deliverable sets out the ethics requirements that are related to the participation of humans in project activities such as workshops, focus groups, interviews, surveys and questionnaires.

The document is confidential, therefore addressed only to the members of the MOSES Consortium. It defines the procedures and criteria that will be used to identify participants and the informed consent procedures that will be implemented. Templates for the informed consent forms and information sheets are also provided.

Issues pertaining to the protection of personal data and health and safety procedures are addressed in deliverables D9.2 and D9.3, respectively.
